

Why Consider Outsourcing your Annual Hose Testing Requirement to FireCatt?

www.firecatt.com

248-643-7200

1. **SAVE TIME** -FireCatt can test in a day what takes some Departments weeks or months. 1,200' per hour, 2 ½ hours per Apparatus, 12,000' per day. And when we leave we guarantee your hose is packed better than we found it!
2. **Save Money-Save Equipment** -Burning up a \$7000 Apparatus pump is common during hose testing. Purchasing a hose test machine, training, tracking, maintaining, and calibrating is expensive. Outsourcing will help you stretch and reallocate your valuable budget dollars.
3. **Reduce Department and City Liability**-Should a Firefighter become injured in the line of duty, or a structure lost 3rd party verification adds a layer of protection and provides the Department a strong defensible position.
4. **Annual Requirement**-by the NFPA. This requirement is in place to protect your most valuable asset-your Firefighters.
5. **Improve your ISO Rating**-Which in turn reduces property insurance costs for your community. ISO requires 3 consecutive years of comprehensive records to achieve the highest score.
6. **Safety**-Injury to Firefighters while hose testing is common. Hiring FireCatt eliminates the dangerous exposure a firefighter encounters when using a pumper truck or stand alone test unit. Our patent pending technology is so advanced we have eliminated "hose whip" through technology.
7. **Increase Training time**-Don't use your valuable training time testing hose when we can do it faster and safer. Instead use your time for mission critical training and certifications.
8. **Burn Out**-Manpower is an increasingly precious commodity, ask yourself how difficult it is to get Firefighters to show up for hose testing.
9. **Documentation**-your hose is bar-coded for tracking ease, you receive a hard copy report and access to an electronic report for sorting capability that can be dovetailed into your existing software. Ever wonder which brand of hose fails the most? You will be able to track this for future purchasing decisions.
10. **Accuracy**-Our testing technology is the only computerized, automated, and "objective" hose testing technology in the Nation. Patent Pending. If your going to outsource choose the best...FireCatt!
